1383****C00-02-019 - Dennis Hanlon and Juanita Hanlon vs. Cox California Telecom, L.L.C. dba Cox Communications.**

This decision dismisses the complaint in this case because events subsequent to the filing of the complaint have rendered the two principal issues raised by complainants moot. First, defendant has relocated to complainants' satisfaction the network interface unit that the complaint alleged had been improperly placed on complainants' premises. Second, complainants' concerns about the alleged failure of defendant's employees to identify themselves when installing telecommunications equipment are the subject of a proposed new rule in R00-02-004. Under these circumstances, neither party has objected to the dismissal of the complaint on the ground of mootness. This proceeding is closed.

1518** **ALTERNATE TO ITEM 623**

In this decision, the Commission exerts its independent state authority under Public Utilities Code § 709.7 to order Pacific Bell Telephone Company (Pacific) and Verizon California Inc. (Verizon) to offer the line sharing Unbundled Network Element (UNE). The decision adopts a permanent UNE rate for the High-Frequency Portion of the Loop (HFPL) of zero for both Pacific and Verizon. The Interim Line Sharing (ILS) decision determined that there should be a true-up from the interim rates adopted in the ILS proceeding, and the final rates adopted in this Permanent Line Sharing Phase. The ILS proceeding established memorandum accounts to track the revenues from the purchase of the HFPL by Competitive Local Exchange Carriers (CLECs). Since a zero permanent rate is adopted for the HFPL, Pacific is required to refund the revenues from the \$5.85 monthly recurring rate, and Verizon, the \$3.00 monthly recurring rate adopted in the ILS proceeding to the CLEC that purchased each loop.

Orders
1 A01-01-003 - Santa Clara Valley Transportation Authority (VTA).
1365

For an order authorizing construction of an at-grade crossing of Hamilton Avenue by the Light Rail Transit Line of the Vasona Light Rail Project in the City of Campbell, County of Santa Clara. The VTA filed this application in January 2001 seeking Commission approval of an at-grade crossing for a light rail transit line in the City of Campbell. The application was protested by the Commission's rail staff on grounds that safety demands a separation of the rail tracks either above or below the roadway. After further study, VTA agreed to grade-separate the project, constructing an aerial crossing over the roadway. At the same time, however, it declined to amend its application and moved instead to withdraw it on grounds that the Commission lacks jurisdiction to approve the construction and placement of light rail crossings. This decision finds that the Commission has jurisdiction to approve the construction and placement of VTA's light rail crossings. It follows that the application for an at-grade crossing is denied, without prejudice to an amended filing by VTA. This proceeding is closed.

2 R93-04-003 - Rulemaking on the Commission's own motion to govern open access to
1372 bottleneck services and establish a framework for network architecture development of dominant carrier networks.

I93-04-002 - Related matters. This decision adopts interim monthly prices for a subset of network elements that Verizon California, Inc. (Verizon) sells to competitive local exchange carriers (CLCs). Specifically, this decision adopts the proposal presented by AT&T Communications of California, Inc., WorldCom Inc., and The Utility Reform Network (TURN) to base interim prices on Unbundled Network Element (UNE) rates recently adopted for Verizon in New Jersey. The New Jersey rates are adjusted based on the Federal Communications Commission's (FCC's) Synthesis Model and deaveraged into two zones for loops. For unbundled loops, the 2-wire interim loop rate is \$10.56 in Zone 1 and \$22.37 in Zone 2. For unbundled switching, the Commission adopts interim end office and tandem switching rates that are 60% and 31% less than current rates, respectively. The Commission adopts a basic port rate of \$2.12 that is 54% less than the current rate. The markup for shared and common costs embedded in current UNE rates shall remain at 22% as adopted in D97-01-022. This proceeding will remain open to set final UNE rates for Verizon. The interim UNE rates adopted in this order are subject to adjustment, either up or down, from the effective date of this order until final rates are adopted. This decision modifies the interim price floor formula adopted for Verizon in D99-12-018. When calculating price floors, Verizon should use the interim UNE rates adopted in this order and incorporate other changes to reflect the lower UNE rates adopted today. Finally, today's order applies a 22% markup for shared and common costs to Verizon's nonrecurring costs and orders Verizon to make several changes in how it has combined these costs to form the nonrecurring prices competitors will pay.

I95-04-044 - Related matters. Disposition of application of Pacific Bell Telephone Company for rehearing of D02-02-025: D02-02-025, denied in part and granted in part a petition filed by Metro One Telecommunications, Inc. and InfoXXX, Inc. for modification of D98-01-022. First, the Commission declined to set immediately the rate to be charged for access to listings for Directory Assistance, but determined that it should be based on the cost of providing such access. Next, the Commission ordered Pacific Bell Telephone Company (Pacific) and Verizon California, Inc. (Verizon) no longer be authorized to charge independent providers of Directory Assistance each time they provide a listing to the public. Relatedly, it determined that, once their costs of providing access to listings for Directory Assistance are computed, Pacific and Verizon will be required to refund to independent providers the difference between the new rates and the rates they were charged since the effective date of the Telecommunication Act of 1996. In addition, the Commission clarified that access supplied independent providers to listings for Directory Assistance should be considered partially competitive, making it a service properly classified as Category II, and thus subject to flexible pricing only within established limits.
